ENGINEERING SCOPE

Requirement → Architecture → Database → Development → Integration → Testing → CI/CD → Deployment → Production

Hands-on Senior Programmer working end-to-end on production systems: POS, member, order, payment, SCM, logistics, reporting, mobile API, and e-commerce integration. Scope includes architecture, database, development, vendor/bank/payment/logistics coordination, UAT, GitLab CI/CD, deployment, and production troubleshooting.

EXPERIENCE

Senior Programmer / System Integrator

2020–Present

Successmore Being PCL

- Build and operate production systems across POS → Member → Order → Payment → SCM → Logistics → Reporting → Mobile API → E-Commerce.
- Backend APIs in NestJS / TypeScript; web clients in Nuxt.js; data stores in PostgreSQL and Redis; containers with Docker; infrastructure on AWS.
- Integrate payment, banking, and logistics APIs (including KEX / DHL) and keep them running in production.
- Python ETL/ELT for operational reporting; GitLab CI/CD for build and deploy; backup and production support.
- Code review, pull request review, task breakdown, debugging, architecture design, UAT, and vendor coordination.

Programmer

2019–2020

T.Logical Co., Ltd.

- Web MIS, corporate campaigns, expense system, and early mobile-POS APIs on PHP 5.2–7.x and MongoDB-backed services.

SELECTED TECHNICAL PROJECTS

POS / Enterprise Platform

Core production POS covering member, order, payment, SCM, logistics, reporting, mobile API, and e-commerce integration. Includes transaction processing, PV / MLM business logic, commission, and day-to-day production operation on AWS.

 Nuxt.js  NestJS  TypeScript  PostgreSQL  Redis  Docker  AWS  GitLab CI/CD

TikTok Shop → POS → SCM

Order and stock integration path from TikTok Shop into POS and SCM so catalog, inventory, and fulfillment stay on one operational flow.

 REST API  Webhook  NestJS  POS / SCM

Payment & Banking Integration

Payment and banking API integration for POS and related operational systems, including production troubleshooting with providers.

 Payment API  Banking API  REST API  Webhook

KEX / DHL Logistics

Logistics API integration for shipment creation, tracking, and operational handoff from POS / SCM.

REST API

NestJS

Production

Python ETL / ELT Reporting

Production ETL/ELT to collect, validate, and transform data from multiple systems into reporting datasets.

Python

PostgreSQL

Data pipeline

Enterprise AI / AECP

Internal AI assistance over operational knowledge using LLM, RAG, and pgvector on PostgreSQL.

Python

FastAPI

PostgreSQL

pgvector

LLM

RAG

Online Face Verification

Online face verification integrated into an operational identity-check flow via API.
